

WE ARE THE LEADING MANUFACTURER OF LONG NECK TUBES

Emballator Tectubes present a wide range
of tubes for internal application.

All products in this range are produced
with pharma grade mono-material which
makes them 100% recyclable.
The production process fulfils standards:
ISO 9001:2015, ISO 15378:2017
and **ISO 14001:2015.**

Long Neck Tube with Twist-off for multiple applications

Our range of Long-neck tubes contain several different sizes and volumes aimed to suit multiple applications as well as products. These tubes with twist-off are intended for single dose usage and are also possible to customize according to wishes of design or functionality. The Long-neck range tubes are produced in a highly automated production process using a 100% green power.

Designed for single dose usage

Various sizez and volumes

User friendly with integrated twist off closure

Safe and comfortable application with soft edges

Long Neck Tube with Cap for precise and hygienic application

For products where precise application is essential, packaging plays an important role in both functionality and user experience. Our Long Neck Tube with Cap is designed to support accurate, controlled and hygienic dispensing, helping users apply the product exactly where it is needed.

The elongated neck enables precise application, while the smooth, rounded tip provides a comfortable user experience. Together, they create a practical packaging solution for products where control and ease of use are key.

Leak proof packaging

Safe and comfortable application with soft edges

Single- and multi dose

Highly automated production process

emballator

Packaging solutions for future generations

Extended Long Neck for feminine care applications

For feminine care products, packaging needs to support both functionality and a positive user experience. Our Extended Long Neck tube is developed for applications where precise, hygienic and comfortable product delivery is important.

The tube features an integrated precision applicator with soft edges and an extended application neck, enabling accurate and comfortable application. Designed for single-dose use, it helps support product integrity while reducing the risk of contamination.

Hygienic and easy use

Hygienic for single dose use

Extended neck for effective application

Easy to fully empty
